

Khush Bakht Naveed

Fullstack Developer | Frontend Developer

Software Engineer specializing in Web Development, currently enrolled in a one-year course in modern web technologies, including HTML, CSS, JavaScript, and the MERN stack. Proficient in responsive design frameworks like Bootstrap and Tailwind. I bring a blend of development skills and QA expertise, enabling me to create dynamic, user-friendly, and scalable web applications. A dedicated problem-solver and resourceful "Googler".

WORK EXPERIENCE

Web Developer Tutor

Digital Career Institute (DCI)

08/2024 - Present

Berlin, Germany

Tasks

- Enhanced student project efficiency, reducing debugging time by 40% through targeted mentoring.
- Led coding workshops for a team of 7 students, fostering collaboration and hands-on learning.
- Encourage problem-solving skills and critical thinking by mentoring students through complex projects.

Relocation and Integration

Moved to Germany

08/2023 - 07/2024

Software Quality Assurance Enginner

Anaconda, Inc

09/2019 - 06/2023

Remote

Tasks

- Improved installation processes and minimized potential glitches through comprehensive black box testing.
- Optimized test execution time by 50% by refining test cases. Executed 50+ end-to-end testing cycles across client projects, ensuring high-quality software releases.
- Identified and meticulously reported 100+ UI, functional, and non-functional bugs in JIRA.
- Conducted thorough API testing, managed Kubernetes clusters.

EDUCATION

Full Stack Web Development

Digital Career Institute (DCI)

05/2024 - Present

Berlin, Germany

Training

- Full-time training program focused on mastering MERN Stack technologies.
- Implemented Responsive Design using HTML CSS frameworks (Tailwind/Bootstrap).
- Completed soft skills trainings on Good HabitZ.
- Consistently developed and delivered a range of individual, small, and large group projects.
- Learned Git and Github for CI/CD for project collaborations within team.
- Actively participated in German language lessons as a part of the program.

Bachelor of Science (Computer Science)

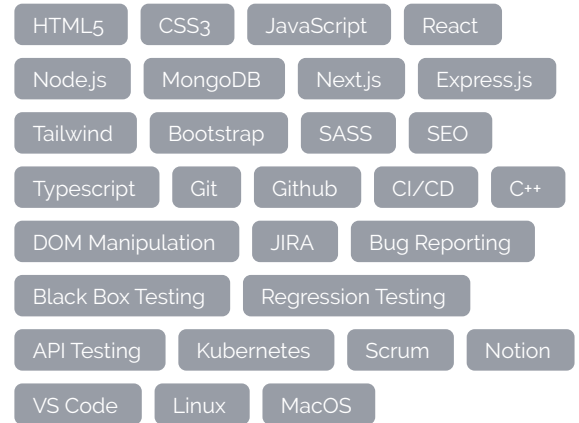

Information Technology University

2015 - 2019

Courses

- Software Engineering
- Database Systems
- Software Testing
- Data Structures & Algorithms
- Web Development
- Object Oriented Programming

SKILLS

PROJECTS

Multinational Museum

- Group project using react showcasing cultures of 5 different countries of the group member.
- museumsphere.netlify.app
